Prices & store links

Build-time snapshot taken 2026-08-14 for the MY region. Steam blocks browser-side price reads, so a live figure would need a backend this app does not have.

GAMES PRICED 734 94.3%	TOTAL OFFERS 1378	TWO+ STORES 499 64.1%	ON SALE 194
-------------------------------------	-----------------------------	------------------------------------	-----------------------

Store	Prices	On sale	Direct links	Search only	Currency
Steam	669	95	705	5	MYR
PlayStation	334	33	344	217	MYR
Nintendo	375	66	379	84	USD
Xbox	0	0	1	502	—

Nintendo quotes USD only — it publishes no MYR price anywhere readable, so those figures carry an approximate conversion marked ≈. PlayStation is fetched per-region and needs none. Xbox cannot be resolved automatically: Microsoft renders store ids client-side, so pairing a title to an id would be guesswork — it links to store search instead of risking the wrong game's price.
